

IT modernization to collaborate and share information across agencies in a secured and streamlined manner for **USDA – Foreign Agricultural Services (FAS)**

Area of Services

- Integration Support & Deployment
- Data Center Topology Planning
- Project Management
- Support & Maintenance
- Operations & Maintenance

The FAS Collaboration Platform Upgrade project was part of the US Department of Agriculture (USDA) wide initiative for IT modernization, which aimed to bring all agencies under USDA under one platform to collaborate and share information across agencies in a secured and streamlined manner.

The project was executed at Foreign Agricultural Services (FAS) USDA where NetVision Resources (NVR) teamed with prime vendor SydanTech. Our staff assisted in inventory collection and identifying of the sites for various program area across FAS and worked with stakeholder to identify the migration effort participated in project planning and execution phases and were able to provide technical approach and migrate few 1000 sites to office 365 cloud-based tenant.

NetVision consultants worked with various development and IT teams across FAS and government stakeholders in defining standardized Application Lifecycle Management (ALM) process with Azure DevOps at FAS.

Accomplishments

- Consistency across projects for creation and maintenance of software deliverables.
- Reduce our server footprint and save on licensing cost for various underlying software.
- Process definition helped enable automation saving man hours and money.
