This is an IDIQ contract named "ITSSC" to provide lifecycle activities for software improvement, database and data administration, software engineering and management support, systems administration, and security.

Peraton, our prime contractor, was one of the awardees to provide support for the SSA's transformation initiatives and IT systems modernization efforts. NetVision Resources (NVR) has been the largest and one of Peraton's key subcontractors on the SSA ITSSC program since its initiation in 2010.

NVR provides support for development of specific strategies and implementation plans. NVR created an Agile IT governance approach, value realization measurement, technical roadmap governance. NVR supported audio and video digital content management and application development, ensuring 508 compliance.

For over 20 years, NetVision Resources Inc. has been a driving force of change with a singular focus to make a significant difference for our clients, country, and society through our IT, Staffing and Managed Solutions.

At NetVision Resources Inc., we strive to tackle the toughest challenges and help our Federal Government and Commercial Enterprise clients make a lasting impact.
